- Khoi Tran
- Thanh Tin

Compilation

Run make. If this does not work, run `g++ --std=c++2b main.cpp heaplotlittle.hpp heaplotlittle.cpp; ./a.out`

Class Declaration

Additional procedures that weren't required by the assignment:

- `Measurement::to_str()`: returns a string (from a stream) that prints out the measurement's quantities line by line.
- `Measurement::rebalance()`: rebalances the quantities if each of them (minus the heaps) can be "compacted".
